"At Baugh Skanska, we believe recycling and reducing waste make good business sense. First and foremost, these practices create a safe work environment. A clean jobsite is a safe jobsite. Recycling also saves our client money and keeps debris out of the landfill. At the new Marion Oliver McCaw Hall site at Seattle Center, we recycled and reused thousands of tons of materials generated from the opera house demolition. Responsible construction practices are good for the environment, the communities we live in - and they're good for business."

Bill Kortum / Baugh Skanska / Project Superintendent
Marion Oliver McCaw Hall / Seattle, Washington

Construction Works

Recognizing jobsites that recycle and reduce waste

King County

Find out how your business can benefit from being a Construction Works member
Call (206) 263-6037 in King County or (206) 389-7281 in Seattle.

Construction Works proudly recognizes these members who recycle,
reduce waste and use recycled-content building materials.

Introduction

The Construction Recycling Directory is a comprehensive listing of construction and demolition material recyclers in the Seattle/King County region. The information in this directory will help you save money! Recycling and reusing materials at your job-site will cut costs on your construction, remodeling or demolition project. Along with saving money, this directory will help you find long-term, environmentally friendly destinations for your reusable or recyclable materials – keeping material out of the landfill.

Use this directory along with the Contractors Guide. The Contractors Guide provides recycling and waste prevention information for all builders, from the handyman and remodeler to large commercial contractors. It is your handbook for saving money and resources by recycling and preventing waste on the job-site. Look for more information about the Contractors Guide on page 42, or visit dnr.metrokc.gov/swd/bizprog/sus_build/ConGuide.pdf to view the online version of the Contractors Guide.

Definition of terms

- ❖ **CDL:** The acronym CDL will be used throughout this guide. It stands for Construction, Demolition and Landclearing materials generated at job-sites.
- ❖ **Construction material** is wood, concrete, drywall, masonry, roofing, siding, structural metal, wire, insulation and other building materials found at construction sites.
- ❖ **Demolition material** is concrete, asphalt, drywall, carpet, wood, masonry, roofing, siding, structural metal, wire, insulation and other materials found in demolished buildings, roads and other structures.
- ❖ **Landclearing material** is natural vegetation and minerals such as stumps, brush, blackberry vines, tree branches, associated dirt and sand, tree bark, sod and rocks.
- ❖ **Source-separated CDL recycling** is the process of separating recyclable materials from materials that will be disposed of as garbage on the job-site.
- ❖ **Commingled CDL recycling** is the process of collecting mixed recyclable materials in one container on-site which is taken to a sorting facility where materials are separated for recycling. Commingled containers must contain at least 90% recyclable materials.
- ❖ **Mixed CDL** means CDL waste containing both recyclable and non-recyclable materials that have not been separated.

Questions?

- ❖ In **King County** call the King County Solid Waste Division Green Building Program at 206-296-4466. You may also find answers to commonly asked questions on King County's website at www.metrokc.gov/greenworks.
- ❖ In **Seattle** call the Business and Industry Resource Venture hotline at 206-389-7304 or visit their website: www.resourceventure.org.

No pricing information is included in this directory. Please call listing for costs and service expectations.

Note: This guide is a listing of area recyclers compiled from information provided to the King County Solid Waste Division and the Business and Industry Resource Venture. It does not constitute a recommendation and may not be all-inclusive. Check local Yellow Pages for additional resources.

How To Use This Directory

Check the **Quick Guide** (starting on page 5) for fast reference to service providers by material, or go directly to the detailed listings on pages 9-35.

For an alphabetical list of service providers, and what they accept, see the **Index** starting on page 46.

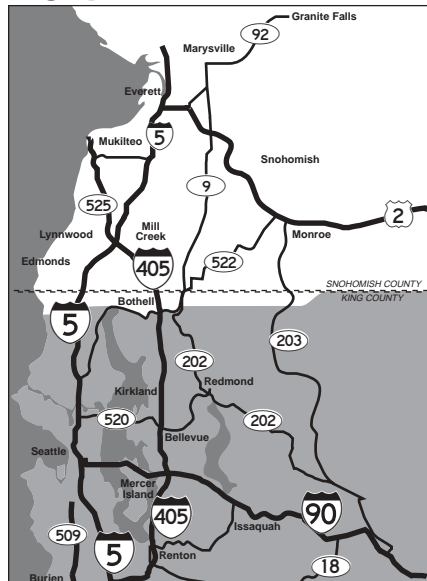

This directory provides listings by geographical area to help you locate resources close by.

The maps below show the regions covered by this directory. Use these maps as a reference when looking for services in your area.

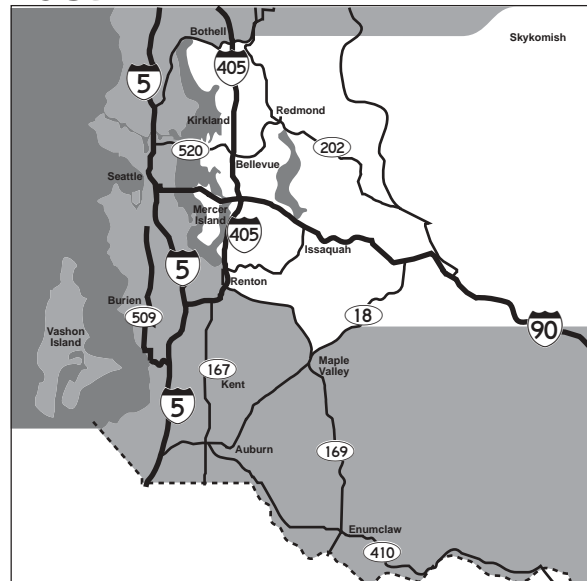

- ❖ The **North** area covers the area north of Lake Washington and into Snohomish County.
- ❖ The **East** area covers the area east of Lake Washington to the county line.
- ❖ The **South** area covers the area south of Lake Washington and into Pierce and Thurston counties.
- ❖ The **West** area covers the City of Seattle and the area west of Lake Washington.

We appreciate any feedback you may have on the directory. If you have comments, please call 206-296-4466 or e-mail your comments to greenworks.swd@metrokc.gov.

Directory of Recycling Haulers

Recycling Haulers

The following is a list of commercial hauling services for construction debris. In addition to basic hauling services, they may also provide on-site container rental, consultation services, and on-call and/or regularly scheduled pick ups. Some haulers will accept commingled CDL materials (i.e., multiple materials in

one container), while others will require you to separate the materials into different bins before they can haul it to a recycling facility. Contact individual haulers to verify services provided, restrictions and rates. See page 43 for more information regarding how to choose a construction recycling hauler.

Commingled CDL Drop-Off Facilities

Some facilities now accept commingled CDL materials for recycling. Commingled CDL recycling is the process of collecting mixed recyclable materials in one container on-site which is taken to a sorting facility where materials are separated for recycling. Commingled containers must contain at least 90% recyclable materials. Please call first to verify any restrictions that may apply.

Fluorescent Lights & Ballasts

In Washington State, waste batteries, mercury-containing thermostats, and most fluorescent lamps are regulated as "Universal Waste." Waste management requirements for universal wastes are streamlined to promote the recycling of these wastes. For example, these wastes don't have to be manifested or counted toward waste generation totals if they are recycled. The ultimate destination must be a recycling facility or a treatment, storage and disposal facility. Generators, collectors or consolidators of universal waste are called "Universal Waste Handlers." Waste management requirements are at WAC 173-303-573. www.ecy.wa.gov/biblio/0004020.html

Fluorescent tubes contain mercury and most are regulated as a federal and State of Washington universal waste. Recyclers separate the tubes into their component materials – glass, metal, phosphor powder and mercury – so that these materials can be recycled or reused.

Directory of Area Recyclers

Earth Protection Services 503-620-2466 6024 SW Jean Rd Bldg E #100 Lake Oswego, OR 97035 ken.epsi@verizon.net www.earthpro.com	Provides environmentally responsible recycling of lamps, ballasts and batteries. Recycling kits with prepaid labels available for shipping materials to their plant.
EcoLights 206-343-1247 9411 8th Ave. S. Seattle, WA 98108 kurtl@totalreclaim.com www.ecolights.com	Accepts and recycles PCB- and non-PCB-bearing lighting ballasts. PCB ballasts need to be handled by hazardous waste transporters and be manifested.

Thermostats (Mercury Containing)

In Washington State, waste batteries, mercury-containing thermostats, and most fluorescent lamps are regulated as "Universal Waste." Waste management requirements for universal wastes are streamlined to promote the recycling of these wastes. For example, these wastes don't have to be manifested or counted toward waste generation totals if they are recycled. The ultimate destination must be a recycling facility or a treatment, storage and disposal facility. Generators, collectors or consolidators of universal waste are called "Universal Waste Handlers." Waste management requirements are at WAC 173-303-573 or online at <http://www.ecy.wa.gov/biblio/98407.html>

CDL Acceptance Policy at King County Transfer Station Facilities

King County owned and operated transfer facilities do not accept commercial CDL wastes. Exemption is provided for private vehicles licensed for 8,000 pounds (standard pickup truck) or less. Small amounts of CDL that are part of a large load of municipal solid waste will also be accepted. Materials may not be longer than eight feet. Bulky items, such as concrete blocks, must be no greater than two feet by two feet in size and weigh less than 200 pounds. If pulling a trailer, total length from bumper to bumper should not exceed 25 feet. For more information regarding the solid waste acceptance policy at King County Transfer Stations, call 206-296-4466.

FOR STATEWIDE RECYCLING LISTINGS, CALL:
1.800.RECYCLE

Report Illegal Dumping

Illegal dumping is a serious and persistent problem in King County. Each year tons of construction debris (wood waste, roofing, concrete), landscaping and yard waste are dumped into forests, streams, ravines and empty lots. The dumped material causes erosion, contaminates wells, water tables and surface waters, attracts pests, creates fire hazards and detracts from the beauty of our natural areas. In addition, cleanup and disposal of illegally dumped material costs taxpayers in Washington State hundreds of thousands of dollars each year.

If you see illegally dumped material, please report it:

In **King County** call Solid Waste Division at 206-296-4466.

In the **City of Seattle** call the Illegal Dumping Hotline at 206-684-PKUP (684-7587).

Reporting For Hazardous Materials

To report the release of chemicals into the environment, call the Department of Ecology at 425-649-7000.

To report the mismanagement of hazardous wastes, call the King County Hazardous Waste Complaint Line at 206-263-3040.

Demolition

All demolition performed in King County requires a permit from the Puget Sound Clean Air Agency: 206-343-8800. Demolition performed in unincorporated areas of King County also requires a permit from the Department of Development and Environmental Services: 206-296-6600. Prior to demolition in the City of Seattle, call the Department of Construction and Land Use at 206-684-8850.

There's got to be a better way...

There is a better way

The **Reusable Building Materials Exchange (RBME)** is an easy way to list, advertise and exchange reusable building materials. Sponsored by the King County Solid Waste Division and the Department of Ecology, the exchange is a practical tool for contractors and businesses with construction waste as well as individual homeowners. Best of all, it's a **FREE** online service. For more information call **206-296-4466**

List carpeting, masonry, tile and yes...even lumber. Sell it, or simply save the costs of hauling it to the landfill. **It's up to you!**

...and it's free online! www.rbme.com

"We sold everything within a week of posting our ad for doors on your site!"

Natural Resources and Parks

King County Green Building Program

King County provides a range of information on green building, including: developing job-site waste management plans, specifying recycled-content building materials and sponsoring training and educational opportunities on green building strategies and techniques.

King County promotes job-site recycling through its Construction Works Program. Green building is promoted through industry education of recognized green rating systems. For home building, the BUILT GREEN™ Program was developed locally and launched in 2000. For commercial building, King County sponsors training through the nationally recognized LEED™ (Leadership in Energy and Environmental Design) program.

Visit the King County Green Building Website at:
www.metrokc.gov/greenworks

Publications

- ❖ Construction Recycling Directory
- ❖ Contractors Guide
- ❖ Construction Recycling Case studies
- ❖ Sample Construction Waste Management Specifications

Available online at: www.metrokc.gov/greenworks.
Printed copies also available by calling 206-296-4466.

Construction Works Program

The Construction Works Program assists builders with setting up job-site recycling and waste reduction programs while providing industry recognition to organizations that encourage the wise use of resources. Membership benefits include:

- ❖ Free technical assistance on sustainable building techniques
- ❖ Media recognition in local business and industry publications
- ❖ Automatic nomination for the King County Green Globe Award
- ❖ Hardhat decals and a job-site Construction Works member display, giving you even greater recognition in the communities where you build

For more information, call King County Solid Waste Division at 206-296-4466. For projects located in the City of Seattle, call the Business and Industry Resource Venture at 206-389-7304.

Reusable Building Materials Exchange

The RBME is a free, online service available to King County residents and contractors, where valuable building materials can be advertised and exchanged.
(www.rbme.com)

Reuse and Recycle Database

The Reuse and Recycle Database is the continuously updated, online version of the Construction Recycling Directory. Here you will find reuse and recycling options for a wide range of materials.
(www.metrokc.gov/greenworks)

King County Environmental Purchasing Program

One of the leading environmental procurement programs in the country, providing information on:

- ❖ Product performance, benefits and specifications of construction materials
- ❖ Model policies

(www.metrokc.gov/procure/green/const.htm)

LEED™ and Built Green™ Programs

Is Your Project Certified?

Certified green that is. Over the last few years a number of organizations have developed green building certification or rating systems for both residential and commercial construction. Locally, two systems are available: Leadership in Energy and Environmental Design (LEED™) for commercial projects and BUILT GREEN™ for residential developments, multifamily, single family and remodeling. These two programs certify buildings as “green” when they incorporate a number of building strategies that conserve resources and protect the environment.

These systems provide an important market-based tool for measuring the “greenness” of a building project and are rapidly becoming the standard by which a building’s environmental performance is measured. If you haven’t heard about them yet, you will soon. Developers are interested in using these systems to market their projects and make a positive impression, while consumers want to buy homes or rent office space that is kinder to the environment. Your clients may ask you to consider these systems or simply require you to use them.

Commercial

Leadership in Energy and Environmental Design (LEED™)

The U.S. Green Building Council offers this national rating system, which certifies projects as LEED™ Certified, Silver, Gold or Platinum based on the number of points achieved. The points are available in five different areas:

- ❖ Sustainable Sites
- ❖ Water Efficiency
- ❖ Energy and Atmosphere
- ❖ Materials and Resources
- ❖ Indoor Environmental Quality

Certification is currently available for commercial projects. The U.S. Green Building Council is also developing a residential program, one for commercial interiors and one for operations. The City of Seattle now requires all its capital projects over 5,000 square feet are built to the Silver LEED™ level, and is encouraging the private sector to build to similar standards through a pilot incentive program (www.cityofseattle.net/light/conserve/sustainability/leed).

US Green Building Council – LEED™ Program

www.leedbuilding.org

LEED™ Supplement for King County

This LEED™ Supplement for King County is a Web-based tool to help owners, architects, designers, contractors, project managers or building professionals develop green buildings in King County, in accordance with the LEED™ Green Building Rating System.

This Supplement provides guidance on applying LEED™ within the context of current King County building codes and interprets the use of LEED™ for three distinct building types: commercial, industrial and ground-based.

dnr.metrokc.gov/swd/leed/default.asp

Residential

Built Green™

BUILT GREEN™ is a residential green building program of the Master Builders Association of King and Snohomish Counties for developments, multi-family, single family homes and remodels. It was developed in partnership with King County, Snohomish County and Fannie Mae. The program is designed to help Puget Sound homebuyers find quality, affordable homes that offer opportunities to protect the health of their families and the Northwest environment. Building projects are certified as one, two or three-star BUILT GREEN™ based on how the projects score on a checklist of green building options.

Features included in BUILT GREEN™ checklist are:

- Green Building Codes
- Site & Water Protection
- Energy Efficiency
- Health and Air Quality
- Materials Efficiency
- Environmentally Responsible Home Ownership

Contractors Guide

For More Information on Preventing Waste and Recycling on the Job-site

The Contractors Guide, a companion to this Construction Recycling Directory, includes information on:

- ❖ Preventing Waste in the First Place
- ❖ Designing Waste Management Plans and Specifications
- ❖ Setting Up a Job-Site Recycling Program
- ❖ Using Recycled Content Building Materials
- ❖ Making Your Program Work
- ❖ Calculating the cost effectiveness of recycling using worksheets

To receive this free guide, call the King County Solid Waste Division at 206-296-4466 or, in Seattle, the Business and Industry Resource Venture at 206-389-7304.

This guide is also available on-line at www.metrokc.gov/greenworks.

Setting Up A Job-Site Recycling Program

Rising landfill fees have made disposal of construction, demolition and landclearing waste a significant expense. Reducing the amount of material going for disposal lowers the cost of doing business.

Identify Recyclables

Asphalt, concrete, cardboard, drywall, metals and wood are easy to recycle in King County. Recycling options also exist for asphalt roofing, fluorescent lighting, carpet, and carpet padding, ceiling tiles and film plastic. Don't forget to set up recycling for beverage containers and paper from the job shack.

Choose a Recycling Method

There are three basic approaches to job-site recycling:

- ❖ **Contract with a recycling hauler who accepts commingled CDL materials.** This service allows contractors to put multiple recyclables such as wood, cardboard and metals in one container. The recycling company takes the materials to a sorting facility where the materials are separated for recycling. Materials not accepted in commingled loads will still need to be source-separated.
- ❖ **Separate recyclables at the source for recycling.** This method involves collecting recyclables in separate containers as they are generated. The recycling hauler takes the materials directly to a recycler or a transfer site. Materials not accepted in commingled recycling, such as carpet or ceiling-tile, must be source-separated for recycling.

- ❖ **Self-haul your recyclables.** Source-separate recyclables in piles or containers on-site and haul them yourself to local recyclers or transfer sites. You may be able to drop off commingled loads at a recycling company. Call to confirm.

Select A Recycler

Specify in an agreement with the recycling service provider:

- ❖ What materials will be recycled
- ❖ Requirement that weight or volume of recyclables be documented
- ❖ Requirement that material will go to a properly permitted facility
- ❖ Costs associated with the service (fees for container rental, hauling, recycling charges)
- ❖ Schedule for picking up containers
- ❖ How containers will be labeled

Involve Subcontractors

- ❖ Include language in sub-contractor agreements that they will recycle
- ❖ Discuss the recycling program at every safety meeting or other regular meetings

Monitor the Program

- ❖ Check dumpsters regularly to make sure material is getting separated properly

Determine Savings

- ❖ Calculate the cost savings from recycling versus disposal using documentation from your hauler

New Construction Works Member Profiles

W.G.CLARK CONSTRUCTION CO.

W.G.Clark is recognized for their outstanding efforts to reduce waste and recycle at the King County Regional Communications and Emergency Coordination Center project located in Renton. W.G. Clark meets an outstanding 75% recycling rate on the project saving, them roughly 20% in hauling and disposal fees!

They have also implemented several waste prevention strategies such as reusing excavated dirt on-site, and involving subcontractors and suppliers in their waste reduction efforts. W.G. Clark Construction Company, based in Seattle, was founded in 1910 and continues as a third-generation family-owned business.

www.wgclark.com

Baugh **SKANSKA**

Baugh Skanska have outdone themselves again, achieving a 92% recycling rate on the Marion Oliver McCaw Hall renovation project in Seattle. The project includes extensive renovation and expansion to the building, which houses both the Seattle Opera and the Pacific Northwest Ballet. Baugh Skanska not only recycles almost all the construction and demolition waste from the site, but also recycles waste from their jobsite offices such as paper and batteries.

What makes this project notable, however, is Baugh's efforts to prevent waste in the first place. For example, materials such as concrete floors, ceiling tiles and vegetation were salvaged and reused on-site. Site Superintendent Bill Kortum acknowledges that while it helps keep a clean and safe jobsite, "recycling also saves our client money and keeps debris out of the landfill."

www.skanskausa.com

LEASE CRUTCHER **Lewis** B U I L D S

Lease Crutcher Lewis has earned membership in *Construction Works* for the Seattle Pacific University: Phase 1 Science Building project. The project achieved a 93% recycling rate by recycling wood, cardboard, metals, concrete, drywall, plastic film and fluorescent lights. Prior to demolition of the existing structure, Lease Crutcher Lewis salvaged the exterior brick and interior materials such as hardware, doors, mechanical fans and wood beams. By renting a reusable, non-wood concrete forming system, they also reduced the amount of waste generated on the site.

In addition to *Construction Works*, Lease Crutcher Lewis is also participating in the LEED™ sustainable building program for the Seattle Pacific University project.

www.lcl.com

New Construction Works Member Profiles

President of Sunshine Construction, Jon Alexander, is an expert in residential jobsite recycling. During the renovation and expansion of a Green Lake home, Jon recycled 65% of construction waste, including wood, drywall, concrete, cardboard and metals. He also used an advanced framing system for the second floor addition and donated salvaged materials to reduce the amount of waste generated on the project. In addition to membership in *Construction Works*, the project is also certified as a Built Green™ home.

jonalex315@aol.com

With five active developments, Quadrant Homes generates a lot of material: an average month could produce over 3,000 tons of waste. But thanks to a comprehensive and aggressive recycling program, only a portion of that waste is going to the landfill. Collectively, these five developments have an average recycling rate of 70%.

Quadrant Homes' commitment to green building is as comprehensive and aggressive as its successful recycling program. Quadrant Homes is a founding member of the Master Builders Association of King and Snohomish Counties' Built Green™ program. The homes certified by *Construction Works* are also certified Built Green™ homes.

www.quadranthomes.com

GLY Construction Inc. has been awarded membership in *Construction Works* for a high-tech office building and parking structure in Redmond. Their effort to recycle ceiling tiles, asphalt, cardboard, carpet, drywall, landclearing, metals, plastic film and wood means that 70-75% of their wastes are diverted from the landfill! Detailed site planning minimized removal of existing vegetation on-site and existing asphalt paving was ground and re-used as backfill.

GLY's commitment to sustainability reaches far beyond the Redmond project requiring mandatory jobsite recycling on all their projects and providing employee training on the LEED™ rating system. Hats off to GLY for their leadership!

www.gly.com

Walsh Construction has made a corporate commitment to enroll all future projects built in King County in the *Construction Works* program. Kudos to Walsh for their environmental leadership! Nordheim Court is the first project to receive Construction Works recognition. This University of Washington student housing complex consists of 146 units in eight, three- to five-story buildings. The tight site had only one access point and required careful daily coordination to locate recycling containers. Walsh diverted a commendable 81% of their construction waste from the landfill by recycling cardboard, concrete, drywall, metal and wood.

Thirty-five percent of the building materials installed at Nordheim Court contain recycled content, reducing the need to extract virgin materials. In addition to *Construction Works*, Walsh Construction is also participating in the LEED™ green building rating system for the Nordheim Court project.

How are the materials recycled/reused/processed? _____

Listings are relevant and active for one year, after which they will need to be updated by email, phone call, fax or letter. If listing changes within the year, it is the responsibility of the business to contact us to update the information.

Disclaimer

Listings in the King County Construction Recycling Directory are provided free of charge to businesses that provide reuse or recycling services to King County residents or businesses. To ensure that the Database fulfills the mission of King County Solid Waste Division, we list only businesses that have requested or accepted inclusion in this directory and who have represented to the County that they provide services that reduce or recycle waste. King County recognizes that inclusion in the Database implies that the business assumes the responsibility for the reuse or the recycling of materials; individuals using this directory must verify the accuracy of such representation. The County makes no warranties as to the accuracy of the information it has been provided. Businesses listed in this directory must also comply with all City, County, State, and/or Federal environmental regulations. Failure to comply with any of these may cause a business to be removed from the Database.

SOLID WASTE DIVISION
ATTN: GREEN BUILDING PROGRAM
201 SOUTH JACKSON ST, SUITE 701
SEATTLE, WA 98104-3855

Make it
YOUR BUSINESS

to know where your
construction and demolition
debris ends up.

Require a disposal receipt.

Each year, tons of construction and demolition debris are illegally dumped in forests, streams, ravines and empty lots. Illegal dumping not only spoils the beauty of our landscape, it also harms wildlife, the environment and people, costing taxpayers in our state *hundreds of thousands of dollars* each year.

To find out if your contractor is insured and bonded, call the Labor and Industries Hotline at 800-647-0982 or try their web page at: <http://www.wa.gov/lni/>

To report illegal dumping call the King County Solid Waste Division at 206-296-4466 or 1-800-833-6388 (TTY Relay).
